

In the Specification

Please replace the paragraph beginning on page 5, line 9, with the following:

A1 -- FIGS. 7A and 7B depicts service account information used to determine the content of files downloaded from the service provider to the digital camera; --

Please replace the paragraphs beginning on page 17, line 13 through page 18, line 15, with the following:

A2 Cont -- FIGS. 7 A and 7B provides an example of the service account information. The customer name, password, customer e-mail address, customer shipping address, and billing information provided by the customer in block 102 is included in the service account information (lines 3-7). The billing information (e.g. credit card number) and other sensitive information provided in the service account can be encrypted to prevent discovery and unauthorized use.

As shown in the example depicted in FIGS. 7 A and 7B, the service account information can also include (lines 9-15) a list of the content of interest to the customer, provided by the customer in block 104. This includes a designation of how often the content information should be updated (line 10), which can be daily, twice daily, hourly, anytime the content changes, etc. It also includes a list of the various topics of interest to the customer (e.g. weather, stocks, sports) selected in block 104. The service account information can include weather categories (line 11) with the cities or other regions of interest to the customer. The service account information can also include a financial categories, such as a stock price category (line 12) providing a list of particular stocks (e.g. EK for Eastman Kodak, INT for Intel Corporation, WMT for WalMart Corp.) of interest to the customer. The service account information can also include a sports category (line 13), providing a list of sports teams of interest to the customer (e.g. Milwaukee Brewers, Milwaukee Bucks, Green Bay Packers). The service account information can also include a news category (line 14), providing a list of new topics (e.g. Rochester, NY local news, U.S. national political news) of particular interest to the customer. The service account information can also include a joke category (line 15), providing a list of humorous topics (e.g. family humor, political humor, sports humor) of interest to the customer.

As shown in FIGS. 7A and 7B, the service account information can also include information describing one or more photo product options selected by the customer in block 106. These can include identifiers (ID) such as Product ID-1 (lines 21-30) which specifies a customized album, Product ID-2 (lines 32-35) which specifies a PictureCD disc, and Product ID-3 (lines 37-42) which specifies customized service prints. The album related information (lines 21-30) includes the page size, album type, and background style selected. It also includes page number information, such as the style, font, and color of the text. The album related information also indicates that designee #1 (e.g. the customer) should receive the order (line 30). --

A3
cancel.

Please replace the paragraph beginning on page 19, line 14, with the following:

-- In block 114, as the group of digital images is uploaded from the digital camera 300 to the content service provider 40, the service account information in FIGS. 7A and 7B is updated to include a list of the uploaded images. The image list (lines 48-66) provides a list of image identifiers corresponding to the uploaded images. The upload list provides a reference number (e.g. Image 1), and the image name (e.g. PIC_0001.JPG) used when the image was stored on the digital camera 300. --

A3

Please replace the paragraph beginning on page 19, line 31, with the following:

-- In block 118, the services and photo products selected by the user are provided by the content service provider 40 and/or the fulfillment system 50. The production controller 52 produces the customized photo products using the uploaded images and the service account information stored in electronic database 44. If the user has ordered an album, the uploaded digital images can be automatically arranged on the pages and printed by color hardcopy printer 54 to produce album pages 56 as described in commonly assigned U.S. Patent Application Serial No. 09/347,310, filed July 2, 1999 by Loui et al.; U.S. Patent Application Serial No. 09/199,724, filed November 25, 1998 by Shaffer et al; and Serial No. 09/199,639, filed November 25, 1998 by Shaffer et al., the disclosures of which are herein incorporated by reference. If the user has ordered one or

my
only

more PictureCDs using the uploaded images, the CDs are produced using CD writer 76. In block 106, the user can select to have a CD produced only after a certain number of images (e.g. 100 images) have been uploaded to the content service provider 40, as described earlier in reference to FIGS. 7 A and 7B. --

AK
and

Please replace the paragraph beginning on page 24, line 5, with the following:

-- In block 130, the digital camera 300 communicates with the content service provider 40 in order to download updated content, such as the latest stock reports, sports scores, etc. This can be done on a regular basis (e.g. twice per day) or on an as-needed basis, as the content changes, depending on the content update option selected by the customer, as described earlier in relation to line 10 of FIGS. 7 A and 7B. --

AS
